Progress in Biophysics & Molecular Biology

Contents

Focussed Issue
Integral Biomathics: Life Sciences, Mathematics, and Phenomenological Philosophy

Prologue
Mathematics and biology: The ultimate interface?
D. Noble 205

Editorial
P.L. Simeonov; S.M. Rosen, A. Gare and D. Noble 208

I. Introduction
Beyond Descartes and Newton: Recovering life and humanity
S.A. Kauffman and A. Gare 219

“Menaced Rationality”: Husserl and Merleau-Ponty on the Crisis and Promise of Science
J.D. Singer 245

Why natural science needs phenomenological philosophy
S.M. Rosen 257

II. Physics, Phenomenology & Consciousness
Yet another time about time … Part I: An essay on the phenomenology of physical time
P.L. Simeonov 271

A complexity basis for phenomenology: How information states at criticality offer a new approach to understanding experience of self, being and time
A. Hankey 288

A new kind of relativity: Compensated delays as phenomenal blind spots
S. Vrobel 303

On the physics of the emergence of sensorimotor control in the absence of the brain
K. Matsuno 313

Heideggerian dynamics and the monadological role of the ‘between’: A crossing with quantum brain dynamics
G. Globus 324

The quantum epoché
P. Pylkkänen 332

III. Mathematics, Computation & Phenomenology
Doing the math: Calculating the role of evolution and enculturation in the origins of geometrical and mathematical reasoning
S. Gallagher 341

Contents continued on inside back cover
**Contents continued on outside back cover**

**V. (Bio) Semiotics, Information & Phenomenology**

Naturalizing semiotics: The triadic sign of Charles Sanders Peirce as a systems property  
*M. Kilstrup*  
563

Can biosemiotics be a “science” if its purpose is to be a bridge between the natural, social and human sciences?  
*S. Brier*  
576

Creation of the relevant next: How living systems capture the power of the adjacent possible through sign use  
*D.F. Favareau*  
588

Signs, dispositions, and semiotic scaffolding  
*E. Fernández*  
602

Semiotic individuation and Ernst Cassirer’s challenge  
*J. Hoffmeyer*  
607

Semiosis stems from logical incompatibility in organic nature: Why biophysics does not see meaning, while biosemiotics does  
*K. Kall*  
616

Finding an information concept suited for a universal theory of information  
*S. Brier*  
622

Biologically inspired information theory: Adaptation through construction of external reality models by living systems  
*T. Nakajima*  
634

Re-live and learn – Interlocutor-induced elicitation of phenomenal experiences in learning offline  
*T. Schilhab*  
649

Naturalizing phenomenology – A philosophical imperative  
*M. Harney*  
661

**Supplement**

Free will: A case study in reconciling phenomenological philosophy with reductionist sciences  
*F.T. Hong*  
670

Integral Biomathics reloaded: 2015  
*P.L. Simeonov and R. Cottam*  
727
PROGRESS IN
BIOPHYSICS &
MOLECULAR BIOLOGY

An International Review Journal

EDITORS

D. NOBLE
T. L. BLUNDELL

Focussed Issue
Integral Biomathics: Life Sciences, Mathematics, and Phenomenological Philosophy
Guest Editors
Plamen L. Simeonov, Arran Gare and Steven M. Rosen
